## BuildUP ALEPPO BUILDING EXHIBITION

Syria is witnessing comprehensive developments and great needs in the construction and housing sectors, which has called many companies to make decisions to enter into various investments in the urban and real estate fields as well as in the industrial field in all the Syrian governorates, and in Aleppo in particular, especially given the return of many industrial workshops and factories of Aleppo.

# BUILDUP ALEPPO

The importance of Aleppo building Fair constitutes an indispensable platform for experts and entities concerned with construction to communicate with each other, develop their business, and discover new trends of the Syrian economy in general and the construction market in Aleppo in particular, in addition to providing all workers in this sector with the most innovative solutions and equipment in the field of urban development, infrastructure, residential areas and sub-urbs, road networks, bridges and tunnels, which meet the needs of the city of Aleppo, especially after the great damage and destruction inflicted on its industrial and residential areas, service infrastructure, and its electrical networks.

## Why BuildUP Aleppo:

The exhibition provides contractors, developers, and property owners with a suitable platform to meet the most important companies working in their fields of competence, which helps them to develop their projects and provide them with an opportunity to secure all the requirements of these projects from raw materials, technical services and specialized products. The exhibition also aims to give construction and building products and materials companies an opportunity to showcase their products, equipment, technologies and services to their target customers, including decision makers and senior corporate officials in the field of construction and construction needed for the reconstruction of Syria in general, and Aleppo in particular.

Given the importance to this exhibition and supporting the reconstruction movement, the participation of companies, institutions and bodies concerned with building and construction will benefit these entities and will clearly contribute to the acceleration of the reconstruction process in Syria, since we are organizing the exhibition in line with the highest standards of organizing specialized exhibitions, ensuring the highest benefit for participating companies and institutions on the one hand, and for specialized visitors on the other.

## BuildUP Exhibition Sectors:

### Construction and Contracting

- Engineering equipment
- Steel structures and prefabricated buildings
- Escalators and elevators
- Measurement and surveying devices
- Equipment and Supplies
- Construction chemicals
- Insulation Materials
- Safety equipment and Occupational Safety
- Construction techniques and public works
- Contracting
- Renovation of buildings

### Heavy Machinery and Equipment

- Machinery & equipment for marble and stone
- Cranes / Tower Cranes
- Earth-moving Equipment
- Tankers, Trailers, and Tractors
- Machinery and equipment for building infrastructure (bridges, tunnels, utilities)
- Waste collection machines & equipment

### Décor

- Home Furniture
- Fabrics and Interior Decoration
- Indoor stoves and fireplaces
- Parquet and wooden flooring
- Wood industry products

### Energy and Power

- Electrical equipment
- Power Generation Plants and Stations
- Electrical Control Panels
- Engines, Regulators, and Transformers
- Electrical Energy Storage Systems (Batteries, and UPS's)
- Electrical Energy Transmission and Distribution Systems (Cables, Transformers, Wires, Insulators, Towers)
- Electrical and Electronic Counters

### Renewable Energy

- Wind Energy
- Solar power
- Power generation of biogas
- Energy from biomass
- Generation of energy from urban waste
- Geothermal energy
- Hydrogen energy
- Intelligent technology for saving and generating electricity
- Additives and alternative fuels
- Energy saving technologies for heating (including water heating)
- Power Distribution Equipment
- Utilization of waste heat and pressure
- Cold and cold storage equipment

### Cladding

- Bathrooms, ceramics and sanitary supplies
- Sanitary piping
- Electrical wiring
- Air conditioning heating extensions
- Walling cladding materials
- Flooring
- Gypsum - Gibson board
- Suspended ceilings
- Paints, finishes and decoration materials
- Lighting systems and equipment
- Alarm and security systems
- Bathroom accessories and kitchens
- Kitchen cabinets and accessories
- Bathroom sets and accessories
- faucets
- External facades
- Glass facades of buildings
- Construction scaffolding and metal scaffolding
- Plastic surface products
- Folding glass systems
- Concrete pipes
- Doors, windows, and shutters
- Garden equipment and swimming pool supplies
- Sandwich Panel

### Marble, Stone and Granite

- Marble and natural stone products
- Marble and stone manufacturing materials

## BuildUP Exhibition Sectors:

### Solid Waste Management and Treatment

- Hazardous waste management and treatment
- Waste treatment and recycling methods

### Electronic Management & GIS Solutions

- Geographic Information Systems (GIS)
- Global tracking systems GPS
- Software solutions
- Resource planning ERP

### Infrastructure and Civil Development

- Development of infrastructure for public utilities
- Infrastructure and municipal equipment
- Energy, communications and gas networks
- Infrastructure pillars and structures
- Facilities of industrial establishments

### Drainage of Rainwater and Drainage

- Treatment and recycling of contaminated water
- Rainwater drainage and treatment
- Management of sewage stations and networks

### Water Technologies

- Water treatment and desalination plants
- Water analysis equipment
- Water tanks
- Well drilling equipment and accessories
- Pipes
- Irrigation systems
- Water supply networks

### Heating, Air Conditioning and Ventilation Systems

### Transport and Transport Infrastructure

- Mass transit
- Road signs and extension boards
- Lighting roads and public utilities
- Road safety
- Construction and maintenance of roads

### City Planning

- Airports construction
- Coastal Zone Management Consultations
- Future and green buildings
- Clean environment, renewable energies and their requirements
- Hospital designing
- Planning of cities and urban areas
- Residential suburbs and their residences
- Infrastructure, municipal and city planning and construction

### Services

- Investment and real estate development
- Engineering and architectural firms
- Officials, commercial and service bodies
- Insurance, finance and development agencies
- Press and Publishing Services

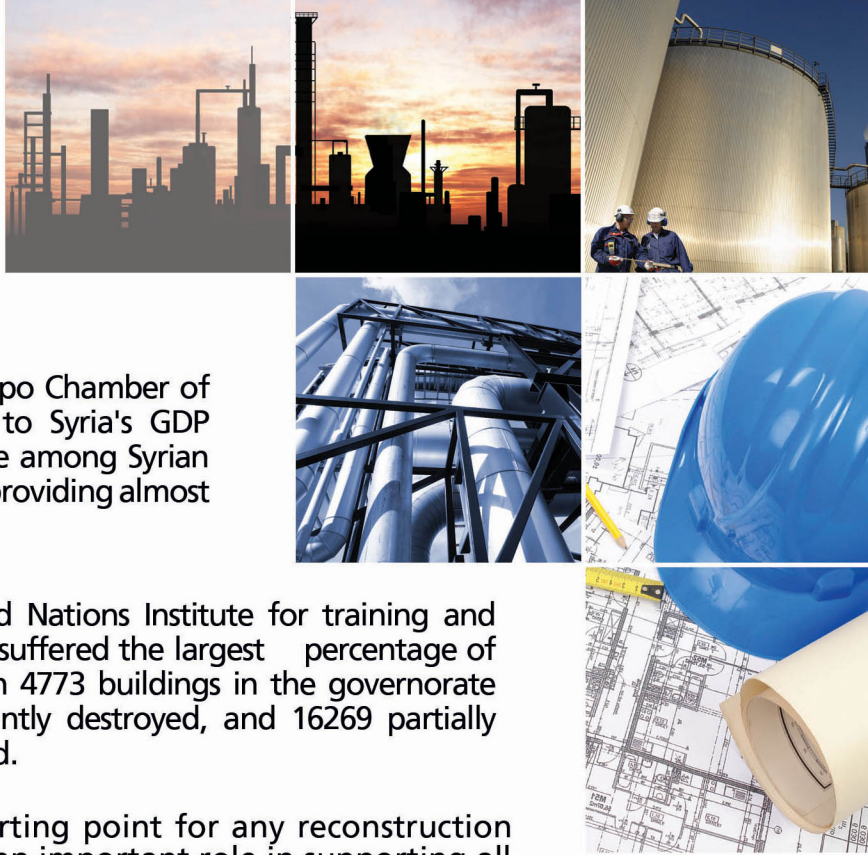

# The economic value of Aleppo and the damages to its infrastructure:

According to the statistics prepared by the Aleppo Chamber of Commerce, the city of Aleppo's contribution to Syria's GDP amounted to about 24%, placing it in first place among Syrian cities in terms of its contribution to the country's, providing almost quarter of Syria's total domestic production.

According to research conducted by the United Nations Institute for training and research (UNITAR) in 2019, Aleppo Governorate suffered the largest percentage of destruction among all Syrian governorates, with 4773 buildings in the governorate completely destroyed, 14680 buildings significantly destroyed, and 16269 partially destroyed, for a total of 35722 buildings damaged.

Since infrastructure is a priority and the starting point for any reconstruction effort, the Aleppo Build Exhibition will play an important role in supporting all economic sectors in Aleppo, as it will provide an ideal environment for companies and individuals specializing in this vital sector to meet and discuss executive and operational projects, which will contribute to supporting individual and industrial production in Aleppo, and work to provide job opportunities for individuals in a city that employed more than 50% of the industrial workforce in Syria before 2011.

## Visitors of Aleppo Buildup

Aleppo exhibition is characterized by attracting economic events and the official presence of people interested in the field of construction and urbanization in addition to businessmen, professionals and companies working in the field of construction and its supplies in Syria, the exhibition witnessed important visits by Syrian ministers, dignitaries and decision makers, during its previous sessions, alongside hundreds of engineers, contractors, technicians, architects, project managers, businessmen, decision-makers (managers, companies owners, partners), sales reps, marketing, agents, distributors, building management, insurance, real estate developers, HR, general services, alongside governmental bodies and official delegations, with a strong presence of media outlets and student delegations from different universities.
