# BUILDEX

## المعرض الدولي للبناء

The International Exhibition for Construction – BUILDEx, one of the region's oldest exhibitions specialized in the construction and building materials sector, succeeded over its past editions in enforcing its presence amongst the most successful international exhibitions in the construction sector. It is recognized as a major event in the Middle East and North Africa region that cater to the industry, where it became, before the war in Syria, the main gateway for many international companies targeting Syrian and neighboring markets.

The importance of The International Exhibition for Construction - BUILDEx originates from the fact that it represents the ideal platform for construction companies to capitalize on the promising Syrian market, by facilitating the productive exchange of knowledge between suppliers, manufacturers, buyers, importers, engineers, consultants, and decision makers.

The Buildex exhibition encompasses all specialties within the construction, building, and cladding sectors. This includes machinery and heavy equipment, green buildings and alternative energy, water technologies, stone and marble, bathrooms, ceramics, and sanitary ware, paints and insulation materials, electricity and lighting, control systems and panels, facades, and both interior and exterior cladding. Additionally, it covers garden equipment and swimming pool supplies, real estate, contracting, construction, and investment projects. The exhibition features participation from leading national, Arab, and international companies engaged in the manufacturing, trading, and distribution of construction and real estate products.
